Objective

Detail-oriented and solution-driven B.Tech (CSE - AI & ML) student with a strong foundation in backend web development using Django. Seeking an internship opportunity in Django development to build robust applications, strengthen REST API integration skills, and contribute to dynamic backend systems. Proficient in developing scalable, secure, and maintainable web solutions.

Education

Bachelor of Technology (B.Tech), Computer Science & Engineering (AI & ML)

Vignan Lara Institute of Technology and Science, Andhra Pradesh

Expected Graduation: 2027

CGPA: 8.55 / 10

Technical Skills

- Languages: Python, C, Java
 - Web Technologies: Django, Django REST Framework, HTML, CSS, JavaScript
 - Databases: MySQL, SQLite
 - Tools & Platforms: Git, GitHub, VS Code, PyCharm, Postman
-

Projects

Job Portal Web Application (Hackathon Project)

- Developed a full-stack job portal with user authentication, recruiter job posting, and applicant tracking.
- Used React.js for frontend, Node.js and MongoDB for backend; deployed using Vercel and Railway.

Snake Game - Django Web App (Mini Project)

- Designed and deployed a browser-based snake game using Django.
 - Integrated HTML5 canvas with Django views and templates for interactive gameplay.
 - Applied Django's MVC architecture to organize code and manage game logic effectively.
-

Certifications

- Programming in C#
- Cisco Networking Academy Certification - Cybersecurity Essentials
- Python Certification - Infosys Springboard

- Complete Web Development Bootcamp

Soft Skills

- Logical and Analytical Thinking
- Team Collaboration & Communication
- Time Management
- Self-Motivation and Learning Agility

Languages

- English (Fluent)
- Telugu (Native)

Interests

- Django Web Development
- Backend Architecture & APIs
- Open-Source Contributions
- Machine Learning Integration
- Cloud Deployment & DevOps Basics
